

Please do not force radio stations such as K-LOVE off the air. They provide a definitely better alternative than to what is rampantly out there... garbage. And at my age (I am 18 years old) I am glad that K-LOVE and AirONE and other stations such as these are choices that I can listen to. These radio stations such as K-LOVE provide such a positive and greatly encouraging impact on communities all across America. If radio stations such as K-LOVE are allowed to be forced off the air, I believe this decision would be detrimental to families and young people such as myself, just listen to the music on K-LOVE and listen to the other stuff, there is a very big difference, a positive difference that radio stations like K-LOVE provide, this positive difference I believe has a major impact on families and young people, they promote family-friendly programming and is not this so desperately needed in these times where divorce, teenage pregnancies, alcohol and drug abuse, etc, has been taking a horrible toll on America's families? Please do not force radio stations such as K-LOVE off the air. Thank you! Sincerely, Jade Alexis Cruz
